

CITCO Application**Date: January 8, 2026**Climate Expertise

The company has extensive expertise in planning, executing, governing, and reporting on greenhouse gas, energy and water management projects. Since 2018, the company has spent nearly \$60 millions to carry out 46 projects related specifically to climate impact management. To accelerate their implementation, financial support was received from governments and utilities. As a results of these projects, the operations has lowered their overall greenhouse gas emissions significantly. Energy efficiency has played a central role in this greenhouse gas reduction program and is core to the company's culture and strategy.

The implementation of a centralized monitoring system has also significantly contributed to reducing its greenhouse gas emissions, energy consumption, and water usage.
